

Workshop #2

Inland Empire Regional ITS Architecture Project

March 4, 2003

Agenda

- Introductions
- Project Background
- ITS Inventory Review
- ITS Needs and Services
- Operational Concepts
- Next Meeting/Calendar Review

Project Background

What is ITS?

**Roadway
Mgmt**

**Traveler
info**

**Rural
Systems**

**Goods
Movement**

**Vehicle
Control**

**Electronic
Tolls**

**Transit
Systems**

What is a Regional ITS Architecture?

Provides a structured framework for deployment and integration.

Helps to introduce and interconnect ITS services across the region.

Identifies “gaps” in systems and services.

Assists in the development of cooperative agreements.

What does a Regional ITS Architecture include?

- Description of the Region
- List of Stakeholders
- Current and Future ITS Elements
- Information Exchange between the ITS Elements
- Operational Concept for the ITS Services
- Functions of each of the ITS Elements
- Applicable ITS Standards
- Project Sequencing
- List of Agreements

What isn't included?

- Selection of Specific Technologies or Designs
- Inventory Counts of Devices/ Elements
- Confirmation that Projects will be Funded

Why this project, why now?

- FHWA/FTA published a Rule/Policy:
 - ITS projects funded from the Highway Trust Fund be in *conformance* with the National ITS Architecture and appropriate standards.
- “Conformance” is defined:
 - As using the National ITS Architecture to develop a regional ITS architecture and the subsequent adherence of ITS projects to the regional ITS architecture.
- Inland Empire status:
 - Earlier ITS Strategic Plan preceded the Rule/Policy
 - Needs modifications to be in conformance
 - Critical date for completion is April 2005

Project Objective

***Develop an ITS architecture
that is useful to the region
and in conformance
with FHWA/FTA guidelines.***

Project Work Scope

Task 1	Project Management
Task 2	Develop Steering Committee and Identify Stakeholders
Task 3	Define Region and Update ITS Inventory
Task 4	Determine Needs, Services, and Operational Concepts
Task 5	Analyze Functional Requirements and Define Interfaces
Task 6	Develop Project Sequencing
Task 7	Develop List of Agency Agreements
Task 8	Develop Maintenance Plan
Task 9	Produce Final Report

ITS Inventory Review

ITS Inventory

- Include Existing and Planned ITS
- Focus on “Centers”
- Collect System Name, Associated Stakeholder(s), Description, Status, Field Element Types, External Data Exchange Interfaces

Inventory Report

- Comments were due Feb. 28
- Received 35 comments from 8 stakeholders
- Still accepting ITS inventory

TurboArchitecture

- Software tool that supports development of regional and project ITS architectures using the National ITS Architecture as a starting point.
- Uses ITS inventory as input; output includes reports, diagrams, and preliminary architecture.

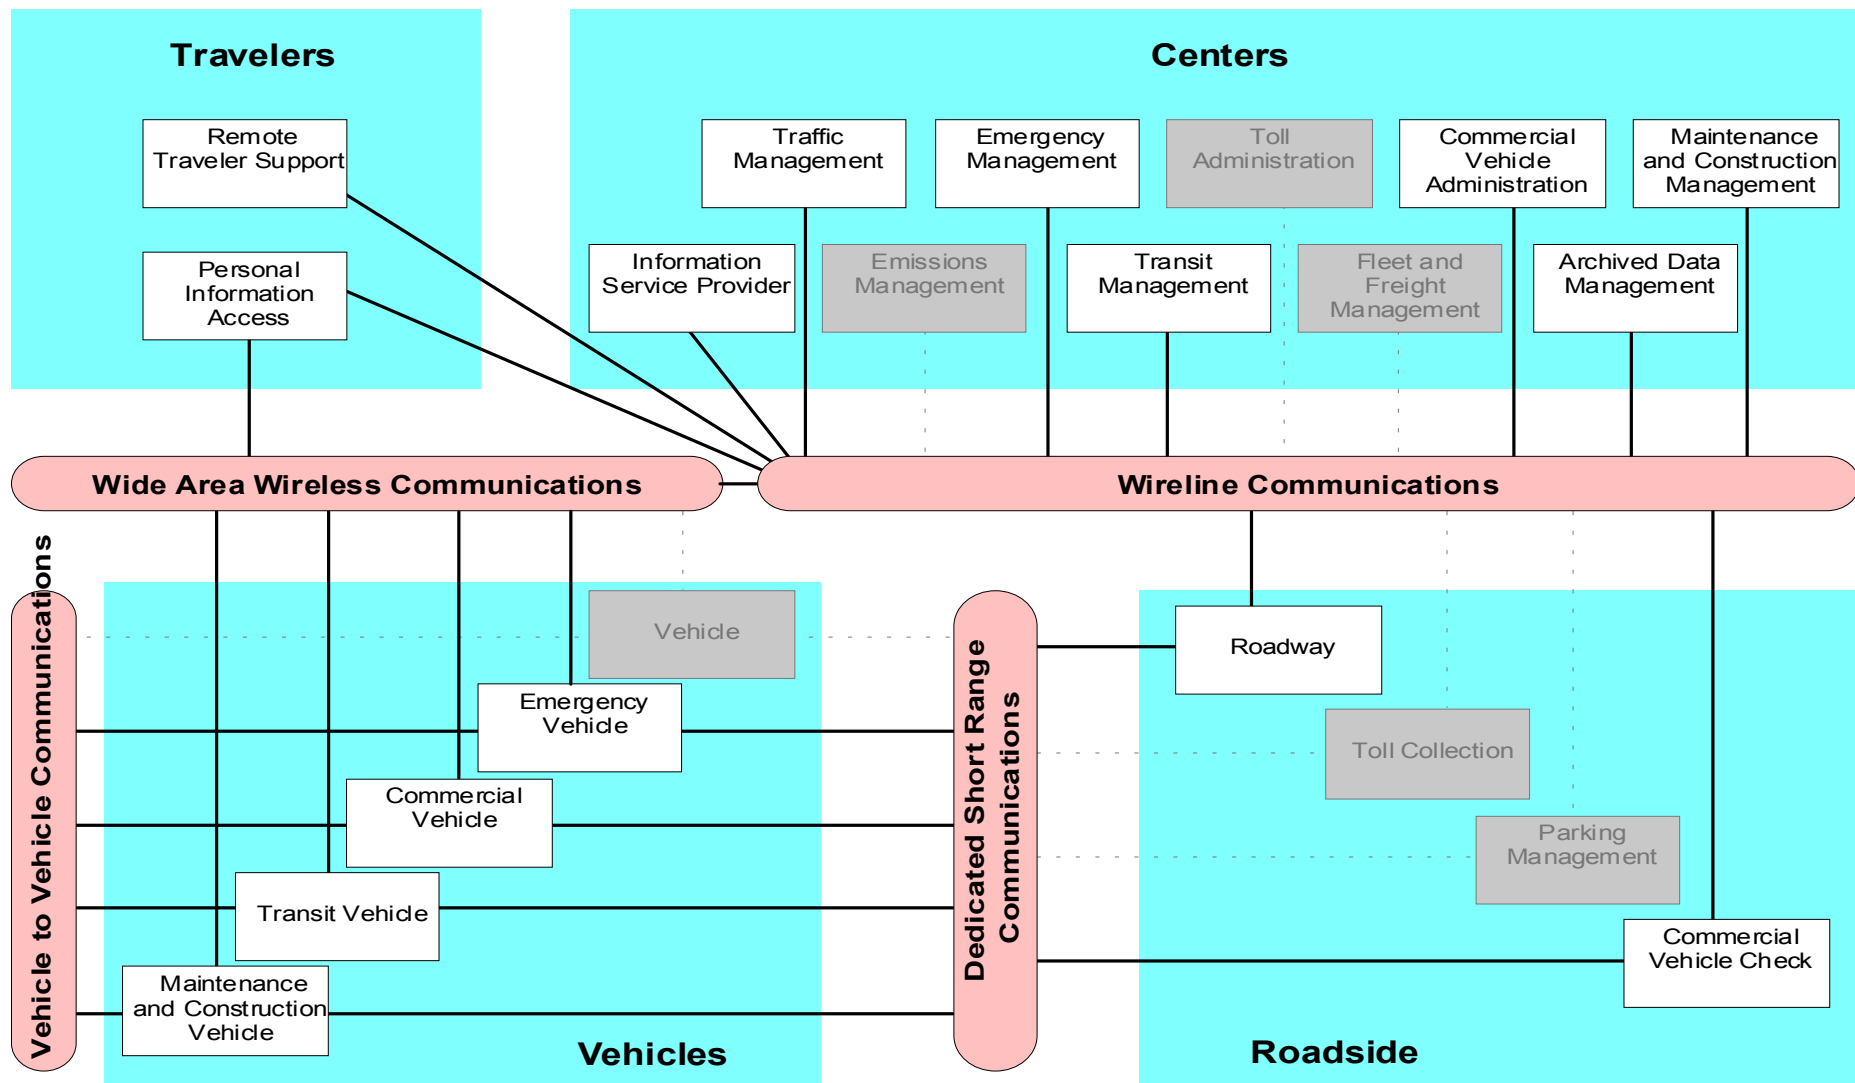

ITS Inventory

- Existing systems appear to map to the following National ITS Subsystems:
 - Centers: Traffic Management, Emergency Management, Transit Management, and Information Service Provider
 - Roadside: Roadway, Commercial Vehicle Check
 - Vehicles: Emergency Vehicles and Transit Vehicles
 - Travelers: Personal Information Access

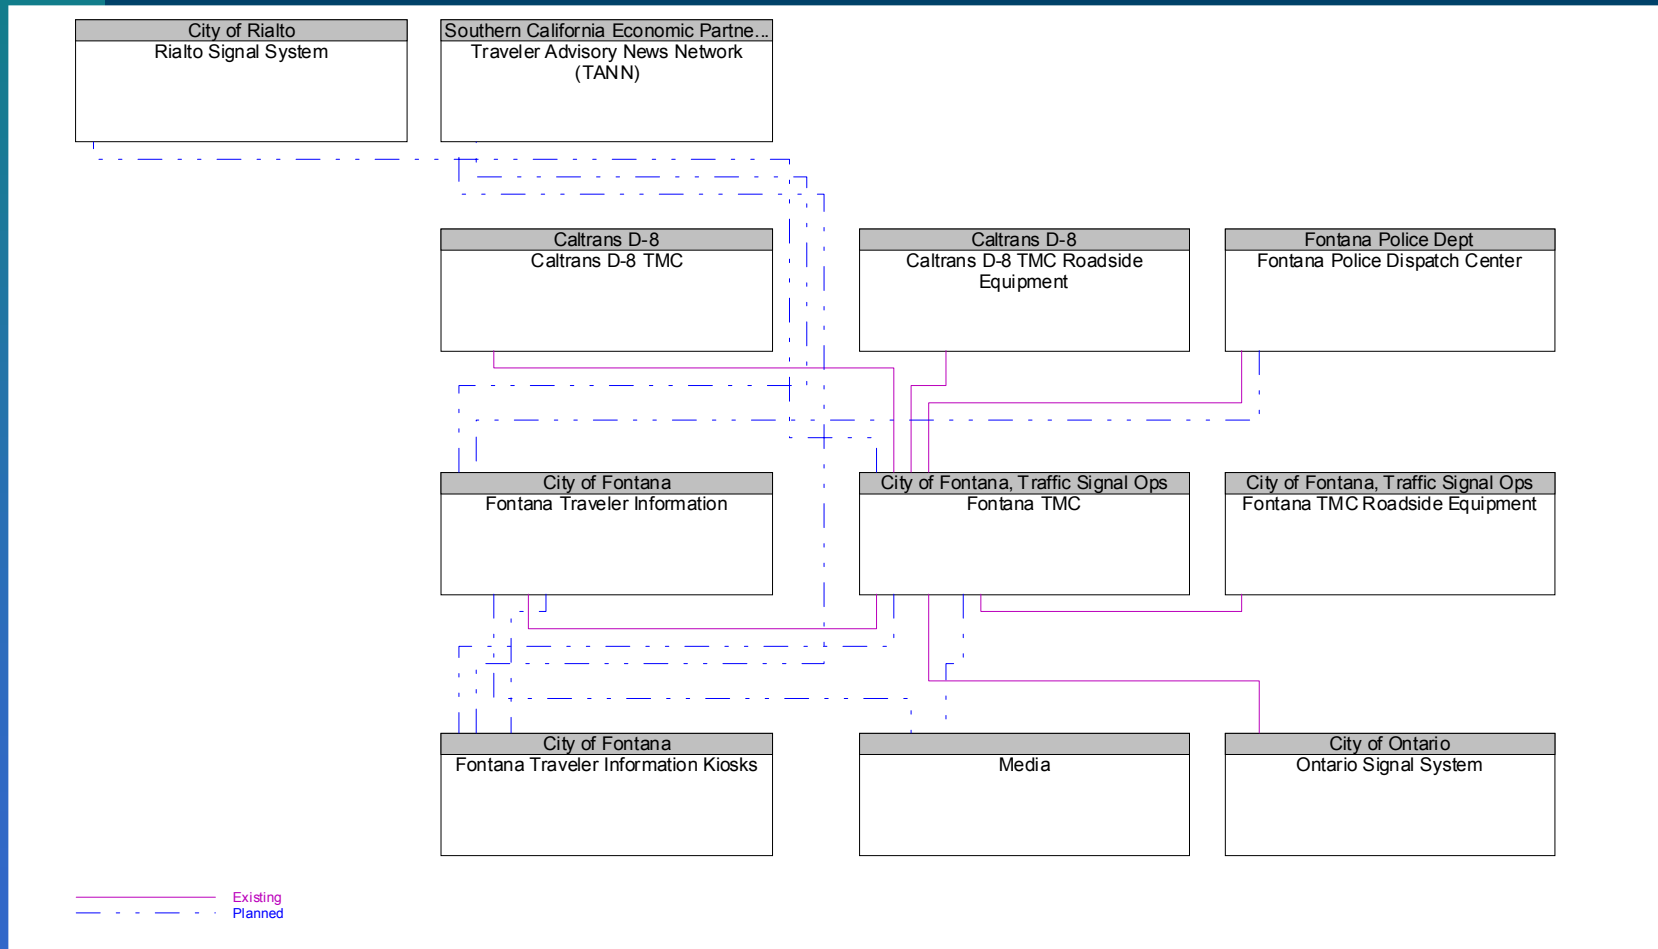

“Sausage” Diagram

- A diagram which depicts all subsystems in the National ITS Architecture and the basic communication channels between these subsystems.
- The sausage diagram is a top-level architecture interconnect diagram.

Preliminary "Sausage" Diagram for Inland Empire

Fontana Interconnects

ITS Needs & Services

Needs & Services

First Step in Determining What the Systems Should Do Tomorrow That They Don't Do Today

Needs & Services

- Needs Previously Documented in Strategic Plan, such as:
 - Increasing Congestion
 - Lack of Traveler Information
 - Lack of Real-Time Traffic Info
 - Transit Service Coordination

Needs & Services

- Refer to handout

Operational Concepts

Operational Concepts

- Defined:

**Current and Future
Stakeholder Roles and
Responsibilities in the
Implementation and Operation
of Regional ITS Elements**

Process

- Use inventory to identify the entity that currently implements, operates, and maintains the ITS element.
- Develop operational scenarios.
 - Tables, Diagrams, Narratives such as “A Day in the Life”
- Example:
 - Incident Management

Incident Management

- Situation:
 - Truck overturns on the I-10, forcing lane closures and traffic diverting through cities
- Who's in charge?
- How does info get out?
- Who does what?

Purpose

The Inland Empire Intelligent Transportation Systems (ITS) Architecture Project website has been established to encourage easy access, timely review and use of the documents and materials by the wide audience of project stakeholders. Project stakeholder feedback will be invaluable in developing an ITS Architecture that reflects the transportation system vision for the Inland Empire. This effort is being funded through a Federal Highway Administration (FHWA) grant to the City of Fontana, and the primary work effort is being carried out through a contract with Iteris, Inc.

What's New?

- The [Draft ITS Inventory Report](#) is now available. Click on the document name to download a PDF version of the document. Also, [click here](#) to download the Comment Form that you will use to submit your written comments. Stakeholder comments due Friday, February 28, 2003
